Summary

I have a solid background in creating beautiful, stable, high performance and functional web interfaces using HTML, CSS, JavaScript and quite a number of frameworks (VueJS, TailwindCSS, Bootstrap and BulmaCSS) in which I have proven experience working comfortably with.

I am passionate about good code and practices, I can work independently and I am result driven. I feel comfortable working with a good team of developers that constantly challenge me and push me to learn new things, I enjoy working on challenging tasks that can keep my mind going even while I sleep.

Experience

Softquest Systems 2018 – 2022

As lead web developer, I participate in the full life cycle of projects in which I work collaboratively with my team on large projects, including solution design, estimation, build/QA, launch and support.
